UPDATED - Rev T - 12/13/17 - Page 1 of 6

When I needed to take my Biennial Flight Review a few years ago, I had considerable trouble locating a competent instructor. The last instructor who signed off my BFR was not available so I called a couple local FBO's. My first two calls showed that local instructors had no idea what a Stinson was, nor did they even have a tail wheel qualification. Earlier a visitor to my Homepage, Dave Shotsberger, asked about the availability of Stinson's for rent, so I decided to provide what information I have.

I am not connected in anyway with those on this list, but it is provided so you may perform your own inquiry. If you have any additions or corrections, please let me know.

This is a list of Fixed Base Operators who have a Stinson available for rent and or instruction. Also included are instructors with Stinson experience and available for instruction. List is in alphabetical order by country. At the end is a section on Stinsons on floats for rent!
