

The Stinson 108 Voyager
Supplemental Type Certificates
By Larry Westin - June 11, 1996
Updated - 03/01/09 - Revision J - Page 1 of 63

DISCLAIMER: This list of FAA Supplemental Type Certificates is provided to help Stinson owners understand modifications which are approved for the Stinson model 108 aircraft. This list CANNOT be considered official, only Supplemental Type Certificates I am aware of are listed. This list can help if you are planning to purchase a Stinson in knowing what areas to investigate before you buy. It may also help by providing a name and address of STC holders if you are interested in modifying your Stinson 108. Unlike previous STC lists which were ASCII text, this list is presented in PDF format only.

IMPORTANT - This **NOT** an official Federal Aviation Administration list of Supplemental Type Certificates. See your local FAA Flight Standards District Office, or Licensed Airframe and Power plant Mechanic who also holds an Inspection Authorization for a complete, up to date list of Supplemental Type Certificates for the Stinson 108 Voyager. When checking for Stinson STC's select Univair since they are the current type certificate holder for the Stinson 108 series airplanes. The Stinson 108 series airplanes are certified under FAA Type Certificate A-767.

NOTE - STC's are available from the FAA on line. Use URL <http://www.faa.gov/certification/aircraft/>
Search under TC Number A-767 for the Stinson 108.

Before installing a modification you must verify the Supplemental Type Certificate is still valid. Obtain a complete up to date list of Supplemental Type Certificate modifications from a Licensed Airframe and Power plant Mechanic who also holds an Inspection Authorization or your local FAA Flight Standards District Office.

Each list begins with the STC number, which is the letters "SA," followed by the number, then which models the STC applies to, a general description of the STC ending with the name and address of the STC holder. Note that many STC's are applicable to more than one type of airplane. Only the specific Stinson model is shown.

This list of STC's are those approved for multiple installations. Some STC's are approved for a single installation only and are not listed here. I retrieved this list, and the order as shown here, is from the FAA Homepage at the URL above.
